CICIND

Model Code for Steel Chimneys

REVISION 1 – DECEMBER 1999

COMMENTARIES AND APPENDICES

TABLE OF CONTENTS

Foreword	3	Appendix 2 – Insulation, Linings and Protective Coatings ...	30
Commentary 1 – Glossary of commonly used words	3	A2.1. Insulation	
Commentary 2 – Safety	6	A2.1.1. General	30
Commentary 3 – Wind Load	8	A2.1.2. Insulation Design	30
C3.1. Wind Speed	8	A2.1.3. Aluminium Cladding	30
C3.1.1. Basic Wind Speed	8	A2.1.4. Mineral Wool or Foam Insulation	31
C3.1.2. Wind Maps	8	A2.1.5. Lined and Multiflue Chimneys	31
C3.1.3. The Influence of Height	8	A2.2. Linings	31
C3.2. The Gust Factor	15	A2.2.1. General	31
C3.3. Vortex Shedding	15	A2.2.2. Design of Separate Liners	31
C3.4. Movements in the second mode	16	A2.2.3. Design of Linings Attached	
C3.5. Owalling	18	Continuously to the Shell	32
C3.5.1. Static effects	18	A2.3. Recommended Start-up Procedures	32
C3.5.2. Dynamic effects	20	A2.4. Protective and Decorative Treatments	32
C3.6. Interference effects	21	Appendix 3 – Guyed Chimneys	33
Commentary 4 – Fatigue	22	A3.1. Guyed Chimney expansion	33
Commentary 5 – Openings	24	A3.2. Guyed Chimney calculations	33
Commentary 6 – Chemical Effects and Internal Corrosion ..	26	A3.3. Guy Ropes	33
C6.1. Chemical Effects	26	Appendix 4 – Access Ladders	34
C6.1.1. Attack Due to Sulphur Oxides	26	A4.1. General	34
C6.1.2. Effects of Flue Gas Desulphurisation	26	A4.2. Definitions	34
C6.1.3. Attack Due to Chlorine, Chlorides		A4.3. Materials	34
and Fluorides	26	A4.4. Finish	34
C6.2. Internal Corrosion	26	A4.5. Stringers	34
C6.3. Selection of materials	26	A4.6. Rungs	34
Appendix 1 – Base Plate Design	28	A4.7. Safety Hoops	34
A1.1. Simple base plates	28	A4.8. Rest Platforms and Landings	35
A1.2. Base plates with gussets	28	A4.9. Attachment to Chimney	35
A1.3. Baseplates with gussets and compression rings ..	28	A4.10. Access Hooks	35
A1.4. Grouting	29
